

There are many ways to make money online now. Actually, there are so many ways to earn money online these days that I can't give you a complete list. There may be thousands, yes THOUSANDS. I have been involved in several of them and know which ones of them work, and which ones don't.

Niche marketing, domain flipping, domain selling/buying, Ad-Sense, Ad-Words. Want more? Classified ads, forum marketing, blogs. If you type any of them in Google, you'll get millions of pages.

This is a problem. Millions of pages telling you their way is the best way to start making money online. So you start looking for sites that review the products and tell you which one is the best. The mess is really big now. Every review site tells you you about different products as the best products that exist.

I found that being consistent is the best way to start and be consistent in niche marketing. Niche marketing is marketing in so called 'niches'. Niches are markets that contain products about hair loss, dog breeding, language learning and so on. You will get these things clear when you go to the site.

Another way to start making money is to go to the 'guru's' blogs and see what they recommend. Some of the gurus in internet marketing are Frank Kern, Ed Dale, Mike Filesame, Rich Schefren and so on. They all have blogs. And recommendations.

I hope this article helped you in deciding what you want to do in order to start making money online!

Derren is an enthusiast in the fields of internet marketing, helping others make the best of their time in any area, learning easily, effectively and proficiently.
